**Mixed Fatty Acid Fast Drying Alkyd Resin Economy**

**Description**
ALK 3936 60 is short oil oxidising modified polyester resin for economical air drying applications and low bake systems for darker shades.

**Suggested uses**
- Dark Shades Vehicle refinishes
- Fast Drying industrial finishes
- Low Bake forced drying products
- Heavy duty primers

**Compatibility**
- Short Oil Alkyd: Less Compatible
- Medium Oil Alkyds: Less Compatible
- Amino Resins: Less Compatible
- Long Oil Alkyds: Incompatible
- Cholorinated Rubber: Incompatible
- NC Resins: Incompatible
- Vinyl Resins: Incompatible

**Solubility / Thinnability**
- Aromatic Hydrocarbons
- Esters
- Ketones
- Limited solubility in Alcohols
- Insoluble in Aliphatic hydrocarbon

**Performance**
- Excellent Colour and colour retention
- Excellent Gloss and gloss retention
- Good Re-coatability
- Good adhesion to metal surface.
- Rapid Air drying

**Recommendations**
In air drying systems 0.05 % CO, 0.5 % Pb, 0.1 % Ca calc as metal on solid resins content are recommended in air drying systems. In lead free systems use 0.2% - 0.6% of Zircioniur can be used as an alternative to Lead.

- Surface dry: 15 Minutes
- Tack free: 120 Minutes
- Hard dry: Overnight

In low bake system recommended level of Melamine Formaldehyde is 5-15% on solid resin basis are added and then baked at 80c.
Storage
It should be stored indoors in the original, unopened and undamaged containers in a dry place at storage temperatures between 5°C & 30°C. Exposure to sun shine should be avoided.

Stability
Under the above-mentioned storage conditions the stability of the resin will be 24 months ex-work.
